InfinityOne Application

Tools & Devices

Complete tools to work anywhere.

Galaxy 250 supports all of the tools that you need regardless of where you work.

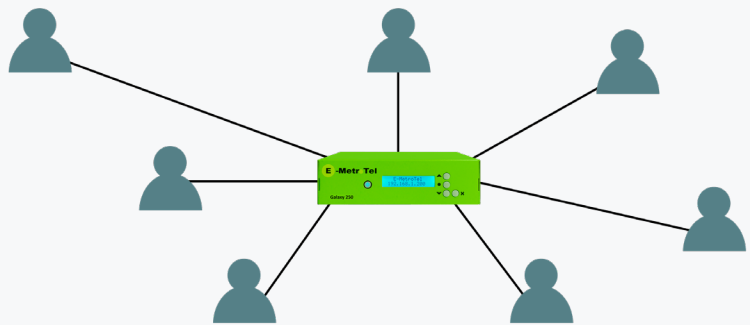

Includes - Full Featured Voice, Voicemail, Call Center, Call Recording, Video Conferencing / Screen Share, One-To-One and Group Messaging, File Sharing, and a lot more.

Non Blocking.

Everyone talks.

It may surprise you to know that many phone solutions on the market only allow a percentage of users to use their phones at the same time.

E-MetroTel solutions allow everyone to use their phones simultaneously. This includes customer calls, voicemail, call center queues. And even includes setting up and managing video conferences.

Privacy & Security.

No 3rd party storage.

Since Galaxy 250 resides on-premise, all of your communications data - Voicemails, Call Recordings, Messaging, Call Records, etc. remain privately and securely on your server.

Work Anywhere.

With just one license.

How it works. All E-MetroTel solutions support a feature called Hotdesking which allows anyone to easily move their programming from one device to another whenever needed. This allows everyone using Galaxy 250 to support multiple devices with a single license.

Values & Specs.

Permanent Licenses. You own the licenses.

Optional support. System works even without support contract.

Intel® CPU power. Over-engineered to assure resource availability.

- ✓ 100 Extensions / 100 Concurrent Calls supported.
- ✓ 600 Hours of Call Recording.
- ✓ Unlimited SIP Trunks.
- ✓ Analog and PRI Trunk support.
